- The highest quality possible

Detox is a biologically active food supplement designed to compensate for the deficiency of biologically active components in your everyday diet. It has anti-microbe effect. It modulates, restores and strengthens the Immune system. It is recommended for people with immune system malfunctions, for combined AIDS treatment. Recommended after viral infections.

Detox does not hide or mask the toxins, it stimulates the natural physiological process to actually flush the unwanted substances from the body. For light to moderate toxin levels, most toxins are completely and permanently removed from the body with one month treatment. In the case of heavy exposure, or people over 180 pounds the body and fluids will be toxin free after bit longer treatment, at the end of which you will be toxin free until that toxin enters your body again.

Pollutants in the air, food and water we ingest can cause damage to our organs and tissues. It is important that we cleanse these poisonous toxins from our bodies regularly. **Detox+** provides a safe and very effective way to help cleanse the body of unwanted toxins that build up in your body on a daily basis. Guaranteed for high toxin levels. Feel that refreshed healthy feeling of a toxin free system all day.

Recommended use:

For adults take one capsule two times daily with water
